

Lectures on

Lorentzian Geometry Granada (Spain)

February 8 ~ 11, 2010

Audience

This is an advanced school for any master/doctorate student as well as any researcher interested in Lorentzian Geometry.

Courses

Lorentzian G-manifolds

By Dmitri Alekseevsky, Univ. of Edingurgh (Great Britain)

Application of Lorentzian Geometry to the Gravitational Lens Effect

By Volker Perlick, Univ. of Lancaster (Great Britain)

Homogeneity and special classes of Lorentzian metrics

By Eduardo García-Río, Univ. of Santiago de Compostela (Spain)

The Splitting Problem in Riemannian and Lorentzian Geometry

By José Luis Flores, Univ. of Málaga (Spain)

Organizers

Miguel Ortega, Miguel Sánchez and Alfonso Romero
Department of Geometry and Topolgy
University of Granada (Spain)
Contact: Miguel Ortega at miortega@ugr.es
